Technical Details:

1. dome surface built from glass panels mounted on top of steel structure,
2. steel structure from stainless steel profiles - outside, and from galvanized, powder painted steel profiles - inside,
3. mounting of glass panels of the dome to steel beams using point fixings from stainless steel,
4. glass roofing made of laminated, tempered glass panels with foil lining,
5. conical shaped glass roof constructed to cover the floor opening inside the dome,
6. produced with welded steel.

Production time 6-8 weeks
